Events of the Month

Doctors identify a disturbing new disease called the Acquired Immune Deficiency Syndrome, or "AIDS." The disease attacks immune system, causing sufferers to lose weight, grow weak, and be infected by a number of other common ailments. The disease is caused by a virus that can infect and be transmitted in human blood. Harvesting 338 million bushels of wheat during the year, North Dakota officially passes Kansas as the country's No. 1 wheat producing state. With the market glutted, however, the big harvest simply means lower wheat prices for North Dakota farmers.

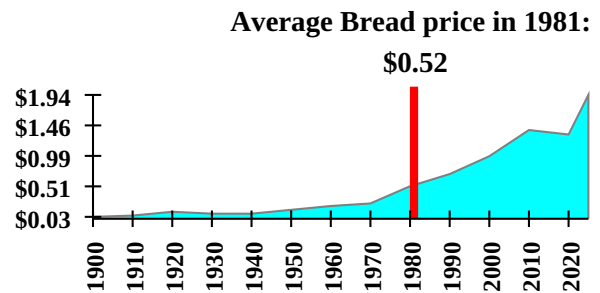

Sports

In football, it's the Oakland Raiders 27-10 over the Philadelphia Eagles in Super Bowl XV. The Los Angeles Dodgers win the World Series in the sixth game against the New York Yankees. The New York Islanders defeat Minnesota for the Stanley Cup in hockey. The Boston Celtics beat Houston to capture the National Basketball Association title. In tennis, John McEnroe and Chris Evert Lloyd win singles titles in tennis at Wimbledon. A horse named Pleasant Colony wins the Kentucky Derby.
